### About Appian

Appian Asset Management is a leading Irish based and owned asset manager, managing a range of funds, which invest globally, to grow and protect our clients' assets while generating sustainable income. There are a range of 6 funds on offer each focused on different areas of investment. From global funds to property funds focused almost primarily on the Republic of Ireland, there is a fund to match any investment criteria.

### Appian Global Small Caps Fund

The Appian Global Small Companies Fund is a Concentrated Equity Fund which invests in small cap stocks globally. It targets long-established, well-managed, high quality, cash generative companies capable of delivering above average growth over time but whose prospects are undervalued by the market.

We seek companies which have a proven competitive advantage or offer a unique value proposition to its customers. Such qualities tend to be illustrated by strong returns on capital, and strong cash generation.

Smaller companies are often more nimble and capable of faster growth than larger companies. Those which demonstrate strong returns on capital allow management to reinvest in those businesses at attractive rates of return on incremental capital invested, supporting sustainable growth in profits and dividends over the long run

### Performance

Performance	3 Month	6 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Inception
